

Vidhi Udasi

Email: vidhiudasi2@gmail.com | Phone: +91 9425667130 | VIT University, India
GitHub: vidhi-sys | LinkedIn: Vidhi Udasi

Summary

- BTech student at Vellore Institute of Technology with expertise in data analytics (Python, SQL, Excel), cloud platforms (AWS), and ERP-based systems
- Combines AI/ML knowledge with practical experience in Deep Learning, NLP, and Generative AI fundamentals.
- Proficient in data visualization using Power BI and skilled in modern LLM platforms including DeepSeek, ChatGPT, Claude AI, and Gemini AI. Languages: English, Hindi.

Education

- **B.Tech in Computer Science & Engineering (AI & ML)** Sep 2023 – Present
VIT Bhopal University, Bhopal, India

Experience

- **Data Research Analyst** Mar 2026 – May 2026
Collegedunia (Remote)
 - Conducted data-driven research and analysis for business intelligence, using analytical tools to extract insights from question papers and latex solutions.
- **Content Writer** Dec 2025 (2 weeks)
InAmigos Foundation (Remote)
 - Created social impact content aligned with organizational goals and ensured consistent brand voice across platforms.

Projects

- **Flight Delay Prediction using Machine Learning + FastAPI**
 - Built an ML model to predict flight delays with high accuracy using historical flight data. *Tech: Python, Scikit-learn, FastAPI, Jupyter*
 - **GitHub:** https://github.com/vidhi-sys/Flight-Delay-Prediction-using-Machine-Learning__FastAPI
- **CatAI – AI-Powered Cataract Detection using n8n and Google Gemini**
 - Implemented an automated medical diagnosis tool leveraging n8n workflow automation and the Google Gemini API. *Tech: n8n, Google Gemini API, AI/ML*
 - **GitHub:** <https://github.com/vidhi-sys/CatAI---AI-Powered-Cataract-Detection-using-n8n-and-Google-Gemini>
- **River Discharge Prediction using LSTM**
 - Developed a deep learning model (LSTM) for accurate river discharge forecasting. *Tech: Python, TensorFlow, LSTM, Jupyter*
 - **GitHub:** https://github.com/vidhi-sys/River_Discharge_LSTM
- **Bank Ticket Resolution Prediction with NLP**
 - Built an NLP model to predict ticket resolution times for banking customer service. *Tech: Python, NLP, Machine Learning, Jupyter*

Skills

- **Programming & Analytics:** SQL, Python (Pandas, NumPy), Power BI, Excel, Data Warehousing, Streamlit, Java
- **AI & Machine Learning:** Machine Learning, Deep Learning, NLP, Generative AI, PyTorch, TensorFlow, LangChain, OpenCV
- **Cloud & Platforms:** AWS, LLM Integration (DeepSeek, ChatGPT, Claude AI, Gemini AI)

Extracurricular

- **Social Media Team Lead** Dec 2024 – Present (1 yr 6 mos)
OWASP Club VIT Bhopal | Hybrid
 - Led social media strategy, increased online engagement, managed team coordination, and promoted cybersecurity awareness.
